PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering student specializing in Artificial Intelligence and Machine Learning, with hands-on experience in web development, machine learning, computer vision, data collection, research, and project development. Experienced with Python, Java, JavaScript, TensorFlow/Keras, Node.js, HTML, CSS, Git, and GitHub. Worked on AI/ML-based fabric pilling detection and a predictive government project monitoring solution. Seeking software development, web development, or AI/ML internship opportunities to apply technical and problem-solving skills in real-world projects.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript

Web Development: HTML, CSS, JavaScript, Node.js, React.js

AI/ML: Machine Learning, Deep Learning, Computer Vision, Image Classification, TensorFlow, Keras

Databases: SQL, DBMS

Developer Tools: Git, GitHub, VS Code, Google Colab, Jupyter Notebook, Vite, npm

Core Skills: Data Collection, Data Preprocessing, Model Training, Model Evaluation, Research, Technical Documentation

PROJECTS

Smart Fabric Pilling Detection

Technologies: Python, TensorFlow, Keras, Computer Vision, Machine Learning

- Developed an AI/ML-based image classification system for identifying fabric pilling grades.
- Worked with fabric image datasets and organized images into five pilling-grade classes.
- Performed dataset preparation, preprocessing, model training, validation, and evaluation.
- Analyzed model performance using a confusion matrix and classification metrics.
- Contributed to research, dataset analysis, and optimization of the image-classification workflow.

Project Drishti — Smart Government Project Monitoring Platform

Technologies: AI/ML, Data Analysis, Research

- Contributed to research and data collection for an AI-enabled government project monitoring solution.
- Researched project-monitoring challenges, datasets, and relevant technical approaches.
- Worked on optimization and analysis of collected information to support project-risk identification.
- Contributed to the conceptualization of predictive and prescriptive monitoring capabilities for project progress, milestones, financials, and risks.
- Supported project documentation and preparation of technical information for the Smart India Hackathon project.

Personal Developer Portfolio Website

Technologies: HTML, CSS, JavaScript, Node.js, Vite

- Developed and customized a personal portfolio website to showcase education, technical skills, projects, and professional information.
- Worked on responsive front-end design and website structure.
- Used Vite and npm for project development and local testing.
- Integrated project and professional information into a developer-focused portfolio.

EDUCATION

NITRA Technical Campus, Ghaziabad

Bachelor of Technology — Computer Science and Engineering (Artificial Intelligence & Machine Learning)

Expected Graduation: 2028 | CGPA: [Add CGPA]

Class XII — 2023 | Percentage: [Add Percentage] | Board: [Add Board]

Class X — 2021 | Percentage: [Add Percentage] | Board: [Add Board]

CERTIFICATIONS

- [Add Certification Name] — [Platform/Organization]
- [Add Certification Name] — [Platform/Organization]
- [Add Certification Name] — [Platform/Organization]

LEADERSHIP & ACTIVITIES

- Class Representative with experience coordinating with students and faculty.
- Team leadership and collaboration experience through academic and technical projects.
- Participated in Smart India Hackathon project development and research activities.

ADDITIONAL INFORMATION

Languages: [Add Languages]

Interests: Web Development, Artificial Intelligence, Machine Learning, Computer Vision
